- Java
- Python
- C++
- Web Development
- HTML & CSS
- JavaScript
- React
- AI Model Engineering
- Data Structures
- Git
- SQL Databases
- MongoDB
- Node.js

Profile

I am a passionate and motivated Computer Science undergraduate student at Sukkur IBA University, eager to apply my technical knowledge and problem-solving skills in a professional setting. With proficiency in Python, Java, C++, Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, and Web Development, I specialize in building efficient and scalable software solutions.

In addition to my technical expertise, I have strong skills in front-end and back-end web development, working with modern technologies to create responsive and user-friendly applications. I am also enthusiastic about Artificial Intelligence, Machine Learning, and Deep Learning, and I actively explore these domains to develop intelligent, data-driven systems and innovative solutions.

Work Experience

I have developed a Restaurant Management System and a WAPDA Management System using Java, GUI, and database integration, demonstrating my ability to create efficient and user-friendly software solutions. Additionally, I have built portfolio websites and other responsive websites, showcasing my skills in front-end development and responsive design. Through these projects, I have gained experience in UI/UX design and database management, while also applying problem-solving techniques to enhance functionality and user experience.

Recently, I worked on training a Deep learning model for Image Captioning, which strengthened my understanding of Artificial Intelligence and provided hands-on experience in integrating computer vision with natural language processing.

Education

Bachelor of Science in Computer, Sukkur IBA University, Sukkur

SEPTEMBER 2022 – JUNE 2026

Intermediate, Cadet College Larkana , Larkana

SEPTEMBER 2020 – APRIL 2022
